BB Design is a developer of many design and web projects for individual and business web sites. Each client gets a free, in person consultation to discuss their project. To set up this consultation call (831) 274-6692 or [click here](#) to have a representative contact you. Every individual or business project has its own specific needs and requirements, and we work to customize each website to the best of each client's needs.

As a start-up, we are giving great bang for your buck in attempt to build a strong portfolio and reputation. Our team works to set up each project correctly and to the clients needs. It is very important that this business expands and to do this we are willing to work with any client, with any budget, with any need. Visit the [Contact](#) page to get in touch and start your website today!
